BOJAN BUINAC

Bojan Buinac, CEO, Owner of BENS Consulting and founder of Allchemist

Bojan is the driving force and the brains behind Allchemist. Since the establishment of BENS Consulting in 1996, he has actively cooperated and formed the field of chemical regulatory affairs. A trainer, lecturer and speaker at various events in southeast Europe.

Responsible for the development of Chemius in 2006 - the first web-based application in the world used for the preparation, management and distribution of chemical documentation. Recognizing the inefficiency of gathering and processing material data in R&D, and often outdated ways of handling the chemical documentation, Bojan and his team invented the first digital solution for every part involved in the paint and coatings industry.

Organizado por la Asociación Española del Comercio Químico
